

The Achievers of America Inc.

Maritza Poventud: Director of Supportive Family Resources

“Moms Helping Moms”

Our Goal is to inform and help the general population by offering supportive and resourceful information to parents and caregivers of special needs Individuals with developmental disabilities, autism and related situations.

A great deal of helpful information is obtained from the many moms throughout the country who have had actual hands on experiences of all types of situations and most of all, how they have handled their situation. This information is valuable to those who are confused and need some helpful guild lines to follow.

Please feel free to ask for any help in an ongoing situation you may have. We will give you support and some helpful information and possibly where you can get some results.

If you have a situation that you solved and would like to share it with us please send it to us as it would help many other families.

Thank you and looking forward in hearing from you.

Sincerely,

Maritza Poventud
